

## Notice Concerning Private Mortgage Insurance – LPMI Initial Disclosure

Date: \_\_\_\_\_ Loan Number: \_\_\_\_\_

Borrower Name: \_\_\_\_\_

Property Address: \_\_\_\_\_

You have applied for a mortgage loan from \_\_\_\_\_ (“Lender”) that requires private mortgage insurance (“**PMI**”). **PMI** protects lenders and others against financial loss when borrowers default. Your loan will have “lender paid” mortgage insurance (“**LPMI**”).

Lender paid mortgage insurance differs from “borrower paid” mortgage insurance (“**BPMI**”) in several ways, and each form of insurance has advantages and disadvantages.

- First, **LPMI** may not be canceled by you, the borrower. By contrast, borrowers may be able to cancel **BPMI** on either (1) the date the principal balance of the mortgage loan is first *scheduled* to reach 80% of the original value of the property or (2) the date the principal balance *actually* reaches 80% of the original value of the property. In addition, assuming the borrower is current on payments, **BPMI** automatically terminates on the date the principal balance of the loan is first *scheduled* to reach 78% of the original value of the property.
- Second, **LPMI** usually (1) results in a mortgage loan with a higher interest rate than one with **BPMI**, and (2) terminates only when the loan is refinanced, paid off, or otherwise terminated.
- Third, **LPMI** may be tax deductible for purposes of federal income taxes if you itemize deductions on your return. Consult your tax advisor for details.

The following analysis reflects the differing costs and benefits of **LPMI** versus **BPMI**:
